

## How to Hold and Play Your Teacarina

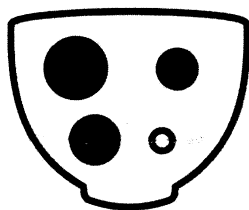

- Place your fingers according to the picture above
- Rest your thumbs on the opposite side of your index fingers
- Put your ring fingers at the bottom of the Teacarina for support
- Blow into the air hole on the top edge of the Teacarina as if you are saying “tu”
- Move your fingers according to the charts below to play various notes.
- At times while playing, excessive moisture can build up in your Teacarina. In order to remove the moisture trapped inside your Teacarina, either blow air forcefully through the Teacarina with all the air holes open, or reverse the airflow and suck the air sharply out of the Teacarina
- After you wash your Teacarina, please wait until it is completely dry before playing it again.
